AVEX Involve (Powered by SoundHive)

Involve is an exciting new web-based ARS platform that facilitates interaction between a host and their audience. Groups can be any size from 2 to 20,000+ attendees. Involve provides session presenters the power to interact with their audience in a much more meaningful and efficient way. All interactions can be logged and exported for post event analytics, and because Involve utilizes standard web based protocols, no expensive hardware is needed—any web enabled device will work. Involve's functionality includes but is not limited to:

- Question & Answer
- Audience Polling/Multiple Choice
- Word Cloud Generation
- Real-time Rankings/Surveys

This powerful tool allows the audience to submit questions to the speaker, moderator, or panel by using their smart phones or any other web enabled device. AVEX's technical staff will work with you to set up a customized, branded landing page for your event, with logos, links, colors and social media connections.

GoPortal Webcasting:

GoPortal is a suite of webcasting products that will allow you to effectively take your message to the next level. This suite of services covers three distinct categories:

- **Messenger:** For recording dynamic messages that will allow you to easily send prepared content including; audio, video, PowerPoint, and rich media clips within your presentation.
- **Collaborator:** This is a phenomenal platform tool well suited for smaller online meetings or web conference where you can share documents, applications and even your desktop. Your online meeting can include PowerPoint slides, whiteboard and chat functions.

- **Pro:** This is the complete production and streaming solution for your vision. We can bring a new level of branding and customization to your next important communication to your clients, shareholders, vendors, employees, or anyone that needs the full impact of your message.

Let us provide the solution that helps you reach anywhere!
