"Guide to Using the Thomas Register of Manufacturers" is a proprietary product of the James J. Hill Center. Updated October 2016. © Copyright 2016. All rights are reserved.

INTRODUCTION

The Thomas Register of Manufacturers is a searchable directory of manufacturers of a wide variety of products. Patrons can use the Thomas Register to build very specific lists of manufacturers, more specific lists than more general business directory databases could build. Manufacturer profiles include a description of the company, a list of all products manufactured, a list of all certifications held by the manufacturer, contact information, company size, and more.

For further information, call our reference line at 651-265-5500, or email us at info@jhill.org.

The Hill Library is open to the public. Please check out our web site for more information and for additional Hill Business Research Guides: <http://jhill.org/reference-library/business-research-tools/research-guides-2/>.

GETTING STARTED

Access the database through the *Database Access* page. Ask a librarian to log you in, then click the *Supplier Discovery* link.
